DETAILED ACTION

Claim Objections

Claim 7 is objected to because of the following informalities: Claim 7 recites "the matching item are displayed ...". It should be "the matching item is displayed ...".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim (US Patent 6,754,435).

Regarding claim 1, Kim discloses a method of searching and playing back video data based on caption-based information (column 1, lines 11-17, 56-67), a user interface being provided to a user for inputting a search information (Fig. 14; column 1, lines 62-67), and the method searching and playing back a specific section of the video data according to the search information (column 1, lines 56-67), the method comprising the steps of: reading caption-based information of the video data (column 2, lines 24-30); establishing a search table based on the caption-based information (column 2, lines 24-30, 65-67; Fig. 12; column 5, lines 17-60); reading a search information (column 2,

lines 32-33; column 7, lines 43-45); searching the search table so as to find out the caption-based information matching to the search information (column 2, lines 17-20); setting a play information (column 7, lines 43-47); and playing the video data according to the play information (column 2, lines 21-23; column 7, lines 54-57).

Regarding claim 2, Kim also discloses the search table comprises at least one sentence (Fig. 14) and its corresponding starting play queue information (column 2, lines 25-30).

Regarding claim 3, Kim also discloses the starting play queue information is a time value (column 2, lines 25-30).

Regarding claim 4, Kim also discloses the starting play queue information is a data amount (Fig. 2; "data amount" is specified by the difference of "Start Address" and "End Address").

Regarding claim 5, Kim also discloses the step of searching the search table includes the steps of: listing at least one matching item matching the search information (Fig. 14); and selecting one item from the matching item (column 2, lines 32-33; column 7, lines 43-45).

Regarding claim 6, Kim also discloses each of the matching items comprises at least one word data and a time data (Fig. 14; column 2, lines 25-30).

Regarding claim 7, Kim also discloses the matching item is displayed in a selection table (Fig. 14; column 7, lines 48-53).

Regarding claim 8, Kim also discloses the selection table is provided for the user to make a selection (Fig. 14; column 2, lines 32-33; column 7, lines 43-45).

Regarding claim 9, Kim also discloses the user interface has an input field for the user to enter the search information (Fig. 14; "Key I/F 23", "User Key Input" in Fig. 13; column 7, lines 7-8).

Regarding claim 10, Kim discloses a method of playing video data by word searching for a user to use a search key and the caption data of video data to search and play the video data on a video playing device (column 1, lines 11-17, 56-67; Fig. 14; column 7, lines 7-8), the method comprising the steps of: reading in the caption data of the video data (column 2, lines 24-30); detecting the depression of the search key (column 2, lines 32-33; column 7, lines 43-45; column 7, lines 7-8); reading in the time data of the current video data (column 2, lines 17-30); and adjusting the video data playing (column 7, lines 41-47, 54-57).

Regarding claim 11, Kim also discloses the caption data include a plurality of sentence data (Fig. 14).

Regarding claim 12, Kim also discloses each of the sentence data contains corresponding starting play queue information (Fig. 14; column 2, lines 25-30).

Regarding claim 13, Kim also discloses each of the sentence data has an item-attribute ("Start Address", "End Address", "Location #1", and "Location #2" etc. in Fig. 12).

Regarding claim 14, Kim also discloses the item-attribute is a seekable video location of numerical type ("Start Address", "End Address", "Location #1", and "Location #2" etc. in Fig. 12).

Regarding claim 15, Kim also discloses the step of adjusting the video data playing includes the steps of: setting a play time according to the starting play queue information (column 2, lines 25-30; column 7, lines 41-47, 54-57); and playing the video data according to the playtime (column 2, lines 25-30; column 7, lines 41-47, 54-57).

Regarding claim 16, Kim et al. also disclose the step of setting a playtime according to the starting play queue information uses the starting play queue information of the previous sentence as the playtime (column 2, lines 25-30; column 7, lines 41-47, 54-57; in the case the "captions are scrolled down outside of the current entry of the PTT table in column 8, lines 24-32).

Regarding claim 17, Kim et al. also disclose the step of setting a playtime according to the starting play queue information uses the starting play queue information of the next sentence as the playtime (column 2, lines 25-30; column 7, lines 41-47, 54-57; in the case the "captions are scrolled up outside of the current entry of the PTT table column 8, lines 24-32).
